

Game Time: Project Week

The Coding Bootcamp

Project Week Overview

You made it!!!

Project Week! (This Week)

Today's Class:

- Divide into groups
- Begin researching APIs
- Outline project ideas
- Submit Project Proposal for Approval
- Initial Design work

Next Class:

- Hardcore Development
- Instructor + TA Workshops

Saturday's Class:

- Hardcore Development

Project Week (Next Week)

Next Week (M/T):

- Hardcore Development

Next Week (W/Th):

- Hardcore Development
- Presentation Prep

Saturday's Class:

- Presentations!

The Great Push

- ***Be serious about project week!***
- Use this as an opportunity to push yourself and prove what you know.
- Because you ***DO KNOW*** shiz.

Teams

Groups

Team #1

Ahmad, Eric, Jen, Shanayah,
Elisabeth

Team #2

Alex, Carlos, Lei, Peter, Cuong

Team #3

Arlette, Devon, Kenny, Michael M

Team #4

Devan, Jeremy, Monique,
Sompon

Team #5

Emanuel, Michael F, Rachit,
Anthony

Team #6

Kinan, Keith, Rasan, Nali

Task

Coding Requirements

- Must use at least two APIs
- Must use AJAX to pull data
- Must utilize at least one new library or technology that we haven't discussed
- Must have a polished frontend / UI
- Must meet good quality coding standards (indentation, scoping, naming)
- Must NOT use alerts, confirms, or prompts (look into *modals!*)
- Must have some sort of repeating element (table, columns, etc)
- Must use Bootstrap or Alternative CSS Framework
- Must be Deployed (Github Pages)
- Must have User Input Validation

Coding – Nice To Haves

- **Utilize Firebase for Persistent Data Storage** (Consider this basically a requirement).
- **Mobile Responsive**
- **Use an alternative CSS framework like Materialize**

Presentation Requirement

- You will also be responsible for preparing a 10 minute presentation.
- This will be a formal presentation.
- One in which you explain in detail:
 - Your overall application's concept
 - The motivation for its development
 - Your design process
 - The technologies you used (and briefly how they work)
 - A demonstration of its functionality
 - Directions for future development
- Treat the presentation seriously!
- Talking intelligently about tech > doing tech sometimes.

Metrics

Metrics

- **Concept**
- **Design**
- **Functionality**
- **Collaboration**
- **Presentation**

Awards Yay!

- **Most Awe-Inspiring**
- **Most Useful**
- **Most Creative**
- **Best Use of Tech**
- **Best UI/UX**
- **Most Hilarious**
- **Most Disruptive**
- **Most Socially Conscious**

API Suggestions

API Suggestions

Stick to APIs that do all of the following:

- Allows CORS
- Simple or no authentication
- JSON response returned
- Well documented

Tools

Collaboration is Critical!

- Steering a project with remote developers like this one can be challenging.
- Consider using the following tools...

GitHub Pull Requests

- GitHub Pull Requests are a great way to “combine” code when multiple users are working on the same files.
- We’ll show you how to use this feature in the next class.

GitHub Issues

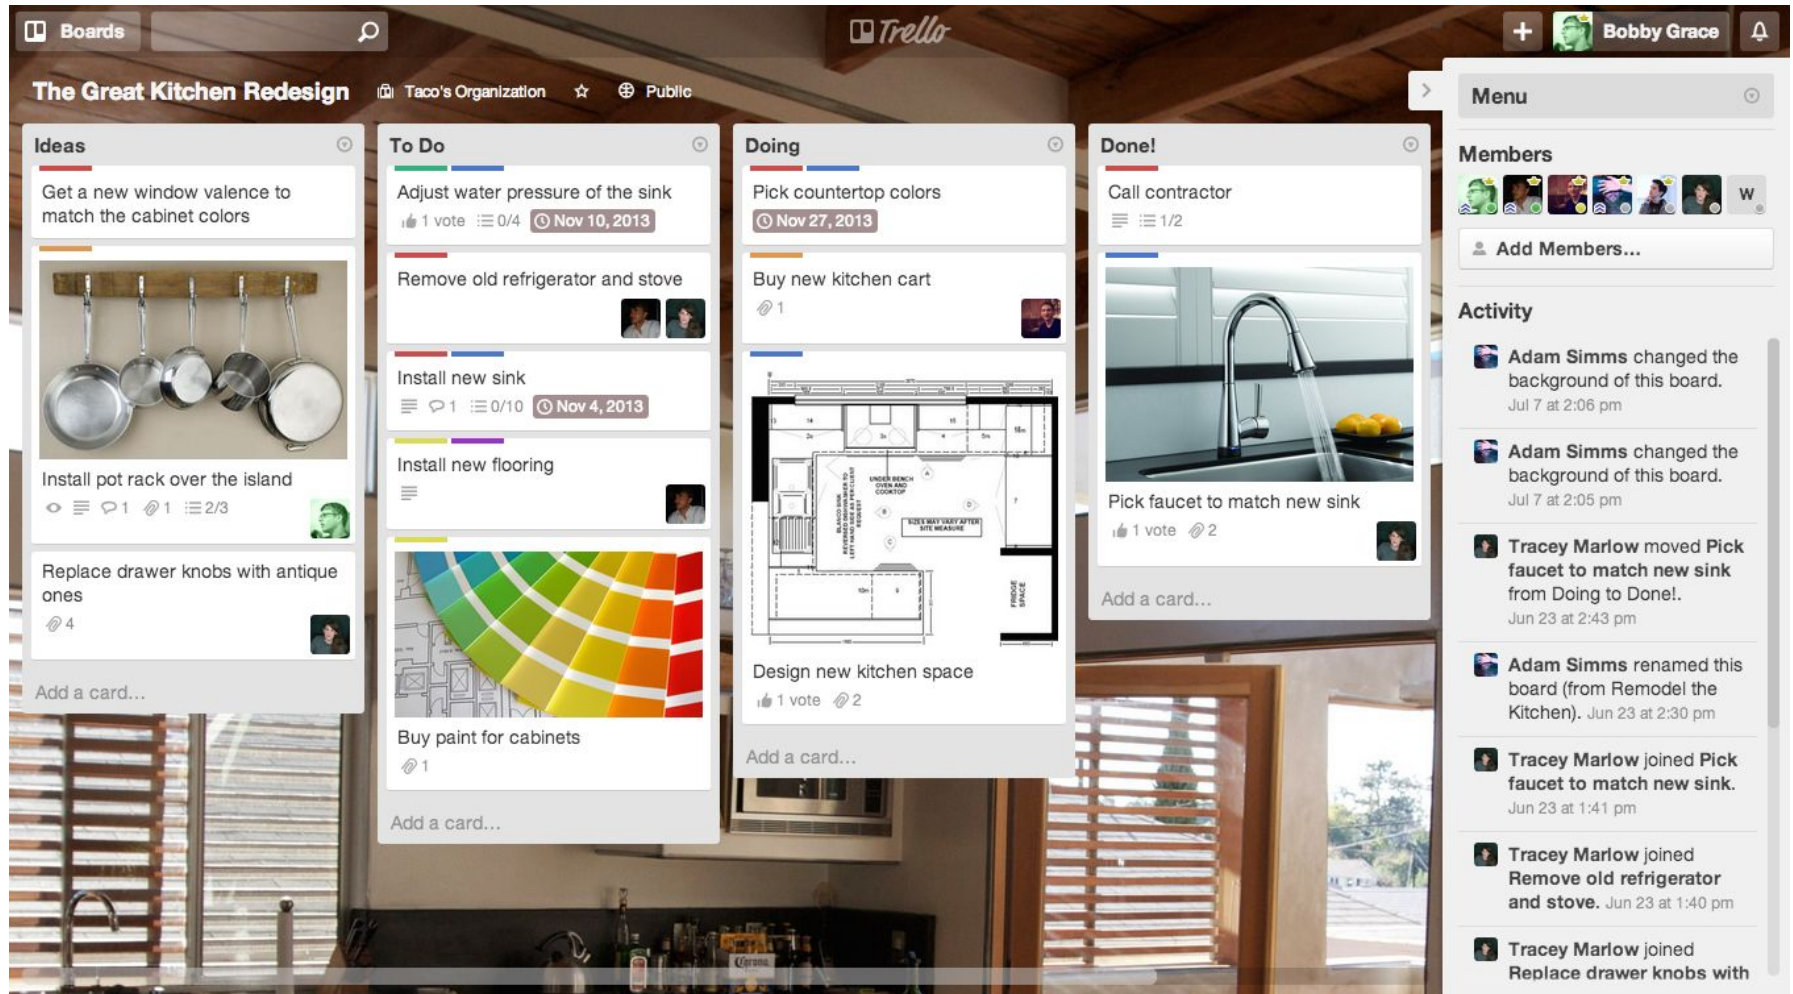

Issues Pull requests Labels Milestones Filters [New issue](#)

- GitHub Issues are a great way to keep track of bugs, feature requests, etc.

Trello

- Trello is a great project management tool for creating to-do lists and communicating updates.

Example Project Ideas

Event Searcher

- Users type in the name of their favorite sporting team.
- Then using the SeatGeek API, your web application points them to the next game and location where the team is playing.
- The web application also provides them a link to Ebay where they can purchase memorabilia associated with the team.

UN Data API

- Use the Unofficial UN Data API to search a user specified country's health records.
- Then use a secondary data source (Google Maps, Flickr, YouTube, etc.) to provide additional context or data.
- Examples: Per Capita Govt Expenditures on Health, # of Physicians, Deaths due to HIV, Malaria Cases etc, low birth weight newborns

Facial Recognition

- Use the Face++ API
- Allow users to provide a URL link to a facial image then provide viewers with information on the image's gender, race, whether they are wearing glasses, and their age
- Use Firebase to update ALL users of the site about the current search

Or...

***Just do your own thing.
Be creative! Be ambitious!***

Today's Focus

By End of Day - Today

- Brainstorm possible ideas
- Begin API Research
- Create an initial draft / sketch of the final design
- Create a short 1 page proposal listing out each of the following:
 - Project Title
 - Team Members
 - Project Description
 - Sketch of Final Product
 - APIs to be Used
 - Rough Breakdown of Tasks
